Titan posts muted growth in Sept qtr

While gold prices were up 14% sequentially and 22% YoY in Q2, Titan booked ₹120 crore in hedging losses

SHREPAD S AUTE
Mumbai, 5 November

Titan reported a muted performance for the September quarter (Q2) on Tuesday after market hours because of higher gold prices and weakness in overall consumption.

This took a toll on the company's key jewellery business, which accounts for 80-85 per cent of overall sales as well as operating profit.

On a standalone basis, the jewellery and watch major's operating revenue was ₹4,435 crore and remained almost flat compared to the year-ago figure. Profit before tax (PBT) stood at ₹429.4 crore, down 3.7 per cent and net profit was up just 1.8 per cent year-on-year (YoY) to ₹320.2 crore.

Even as tax outgo fell with the company shifting to the new regime, revenue, PBT, and net profit were below Bloomberg consensus expectations of ₹4,569 crore, ₹482 crore, and ₹362 crore, respectively.

Higher gold prices not only pulled down overall demand for the yellow metal amid feeble consumer sentiment (jewellery volume was down 14 per cent), but also led to the highest ever hedging losses for the firm. While gold prices were up 14 per cent sequentially and 22 per cent YoY in Q2, Titan booked ₹120 crore in hedging losses. It must be noted while Titan had recently indicated of hedging losses in its Q2 update last month, hedging loss only affects the top line.

If it had not been for hedging losses, Titan would have reported 7 per cent growth in retail jewellery sales in Q2, as compared to a 1.5 per cent YoY decline in the reported sales, its first decline since September 2015 quarter. Growth in watches business, too, fell to 6.4 per cent from 20.4 per cent in Q1.

ALL THAT GLITTERS...

Jewellery segment's reported **sales down 1.5% YoY**, its first decline since September 2015 quarter

Company cuts revenue growth guidance for the October '19–March '20 period to **11-13%** from 20% earlier

Jewellery business grew by 10% during Dussehra and Diwali

Growth in watches business, too, fell to 6.4% from 20.4% in Q1

Due to the lacklustre performance and more than expected weakness in consumer sentiment, Titan lowered its H2FY20 (October 2019 to March 2020) revenue growth guidance sharply to 11-13 per cent from 20 per cent.

However, the road ahead may not be as bad. Improved jewellery demand during the festive season and the upcoming wedding season should help the business.

According to the manage-

ment, jewellery business grew by 10 per cent during Dussehra and Diwali.

Demand pressure was more for low-priced jewellery. Off-take of pricey products was relatively better in Q2, with share of studded jewellery up at 38 per cent from 25 per cent in Q1 and 35 per cent a year ago. This supported a 127 basis point YoY expansion in overall gross profit margin, besides inventory gains. Discounts and feeble operating leverage, however, restricted improvement in operating profit margin to 97 basis points YoY at 11.6 per cent.

"Given the dismal performance in H1FY20 (April to September 2019), there would be a downward revision in Titan's revenue growth and operating margin for FY20, warranting a valuation de-rating for the stock," says Priyank Chheda, analyst at Reliance Securities.

At 51 times FY21 estimated earnings, the stock is trading at 35 per cent premium valuation to its long-term historical average.

Tech Mahindra betters Street income estimates

Revenue grows 5% YoY; PBT falls 7.5%

ROMITA MAJUMDAR
Mumbai, 5 November

Pune-headquartered Tech Mahindra on Tuesday reported that it had beaten Street estimates, with its revenue growing to ₹9,070 crore in the July-September (Q2) of 2019-20 (FY20), a 5.1 per cent rise year on year (YoY). Its profit before tax (PBT), however, was down 7.5 per cent to ₹1,337 crore YoY.

A strong digital growth and new deals, however, helped it clock 5.6 per cent YoY growth in profit after tax (PAT) to ₹1,124 crore. In the June quarter, the company had missed estimates to report revenue earnings of ₹8,653 crore and PAT of ₹959 crore.

On a quarter on quarter (QoQ) basis, the firm's revenue grew 4.8 per cent and PAT grew 17.2 per cent. Bloomberg had estimated 3.3 per cent YoY revenue growth and 12.3 per cent dip in net income. Earnings before interest, tax, depreciation, and amortisation (EBITDA) stood at ₹1,500 crore, while the Ebitda margin was reported at 16.5 per cent, up 130 basis points. Sources said overall efficien-

cy and lower visa costs helped the numbers.

In dollar terms, the company's profit was at \$158.6 million, while revenue was \$1.28 billion in the Q2FY20. "We had indicated in Q1 that we were in the closing stages for a few large deals and it has been a record quarter for deal wins. We saw broadbased revenue growth across all geographies," said C P Gurnani, managing director and chief executive officer, Tech Mahindra. During the quarter, the company signed a six-and-a-half-year agreement with AT&T to expand strategic collaboration, accelerating the latter's IT network transformation, shared services modernization, and movement to the cloud.

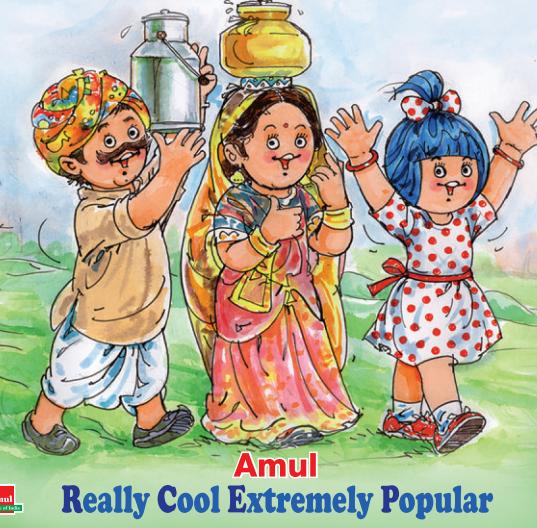

This deal comprised over \$1 billion. The total contact value

reported during the quarter was \$149 billion. Revenue flow from this deal will start by Q4FY20, said the management of the company. However, the deal wins will also come with transition costs, they said. The company also announced the acquisition of BORN Group, an integrated agency headquartered in the US, to bolster capabilities in commerce and customer experience (CX). BORN Group offers end-to-end digital engagement for \$95 million. The company will also source all 1,000 employees.

Manoj Bhat, chief financial officer, Tech Mahindra said, "Except for manufacturing, growth has been good. Europe was flattish because of a currency impact. Our tax rate was slower because of a large tax refund this quarter of about 17 per cent while it is usually around 26 per cent." The management said all transition costs from these deal wins will be completed in the next two quarters and they have already started the processes.

Total headcount stood at 131,522, up by 5,749 QoQ, largely led by BPO services while software headcount reduced. Attrition remained at a high of 21 per cent while employee utilisation also remained high at 83 per cent.

JSPL posts net loss of ₹399 cr for Sept qtr

Jindal Steel and Power (JSPL) on Tuesday posted a consolidated net loss of ₹399.31 crore for the quarter ended September 30. However, the company had posted a consolidated net profit of ₹279.17 crore in the year-ago period.

Torrent Power posts Q2 PBT growth of 6%

Torrent Power has posted a marginal 6 per cent growth in its profit before tax (PBT) for the second quarter ended September 30, to close at ₹532.87 crore. The firm had witnessed a PBT of ₹501.87 crore in the corresponding quarter last year on a consolidated basis. The firm's revenue from operations, however, grew by 11.52 per cent in Q2 of FY19-20 at ₹3842 crore, up from ₹3,445 crore in Q2 FY18-19 on a consolidated basis.

BS REPORTER

Dabur PBT down 2.5%

Continued slowdown in consumption in the local market has hit Dabur India's profitability. The fast-moving consumer goods major on Tuesday declared 2.5 per cent drop in its profit before tax (PBT) for the July-September quarter. The firm's PBT declined from ₹473.7 crore last year to ₹461.8 crore. Apart from poor uptake, its bottom line was impacted by a one-time impairment in value of investments to the tune of ₹40 crore.

During the quarter, the company clocked 4.1 per cent year-on-year (YoY) growth in consolidated revenue from operations, from ₹2,125 crore to ₹2,212 crore. While the India business — forming 69 per cent of its total sales — rose 4.9 per cent, led by 4.8 per cent volume growth. Its international business, how-

ever, grew by 3.2 per cent — bringing down its overall volume uptake further. A 35 per cent decline in its business in Nepal dragged down its overseas business growth. "The domestic business continues to face heavy headwinds in the form of a sustained slowdown in demand, aggravated by the liquidity crunch in the market," said Mohit Malhotra, chief executive officer, Dabur India.

Benign raw material prices helped Dabur expand its operating revenue. Its total cost of materials decreased by 142 basis points (bps) to touch 49.2 per cent in the quarter. Resultantly, operating margin improved by 91 bps to touch 22.1 per cent. Expenditures related to media and promotions, however, increased marginally.
